A systematic approach to abdominal X-ray interpretation is therefore relatively straightforward. This involves assessment of the bowel gas pattern, soft tissue structures, and bones. Full assessment includes a check of patient data, image quality, and checking for artifact and abnormal calcification.

Small bowel obstruction - causes The most common causes of obstruction are adhesions secondary to intra-abdominal surgery, hernias, tumours and Crohn's disease. Regardless of whether there is evidence of these causes on an abdominal radiograph, a full surgical history should be taken and examination of the hernial orifices should be performed.
